

prFBA vs PICRUSt2 — EC-space functional prediction on 67,038 benchmark amplicons (10,000 genomes × 8 16S regions)

A Precision collapses with novelty
(PICRUSt2 answers regardless)

B prFBA abstains instead
(below its 0.865 family floor it answers nothing)

C prFBA is more accurate in every region when it answers
(paired Wilcoxon $p \approx 0$; median $\Delta F1 +0.08$ to $+0.10$)
